

Developer (Java/Appium) Gurgaon, India

We are looking for a Developer to join our product development team in our dynamic Gurgaon office.

Our automated testing tool, **Provar**, specializes in testing Salesforce, the market-leading cloud CRM platform. Our dev team is responsible for developing the tool with efficient code following best practices.

We are looking for a dynamic, self-starter to help expand our test automation offering for Mobile devices. This covers real-device testing of native, hybrid and web apps on both iOS and Android.

We are looking for an experienced Java developer with real world experience of Appium's XCUITest and UIAutomator/2 drivers. The successful candidate will be able to answer advanced questions about local Appium configuration and troubleshooting.

The position will offer the candidate the opportunity to gain real-world experience across several leading edge technologies/domains including Salesforce CRM, Angular 6, NodeJS, Typescript, HTML5 and many more.

Responsibilities

- Understand and question business requirements
- Contribute towards the technical design
- Implement design using TDD and best development practices
- Provide support for quality assurance testing and defect resolution
- Prepare and package production ready code modules for staging
- Provide support Provar's internal Regression, Customer Success and Consulting teams.
- Provide support to external customers as required.
- Escalate any issues to your line manager promptly
- Participate in product team meetings and communicate effectively with peers, architects and across other technology team boundaries, reporting product status as required
- Become a product expert in Provar
- Build strong skill sets and add value as a technical expert for various applications.
- Study upcoming tools and technologies and use them to improve existing solutions and processes.
- Learn Salesforce and complete the Salesforce Admin examinations

Skills required

You should be friendly and resourceful and have evidence of the following:

Essential:

- 3+ years Core Java
- 1+ years Appium with XCUITest and UIAutomator/2 drivers
- Experience of working in small and large teams with Requirements, Design and Development phases and complex implementations
- Willingness and aptitude to learn new skills in a rapidly changing environment
- Excellent communication skills (Oral, written and presentation), organizational and collaboration skills

Preferable:

- Knowledge of CRM solutions, preferably Salesforce.com
- Angular / Typescript
- NodeJS
- Knowledge of Grunt or Gulp
- Experience of TDD or BDD development cycle
- The candidate must have strong visual design skills and be able to provide real-world examples which demonstrate these skills

What you'll receive

- Competitive salary
- Comprehensive health insurance
- Vibrant culture with regular social activities
- Fun and friendly team

About Provar

Provar is the only code-free, integrated automation testing tool for Salesforce. We deliver the benefits of automation while avoiding the pitfalls of other tools. See our demo videos at vimeo.com/provartesting.

We have offices in Gurgaon (India), London (UK) and Nashville (Tennessee).
