

Associate Developer

Gurgaon, India

We are looking for Associate Developer to join our product development team in our dynamic Gurgaon office.

Our automated testing tool, **Provar**, specializes in testing Salesforce, the market-leading cloud CRM platform. Our dev team is responsible for developing the tool with efficient code following best practices.

This is an awesome opportunity for a computer science graduate with a professional, dedicated and flexible approach to develop their skills in a fun and stimulating Product Company.

You'll also gain exposure to a vast number of technologies, including Core Java, Salesforce, Google Apps, Domain-Specific Languages, REST, SOAP, MQ, JDBC, Javamail, Selenium, Eclipse plug-in development, cglib, JavaScript, AngularJS, Chrome Extensions and many more! You will receive all the training you need Provar and Salesforce.

Responsibilities

- Understanding business requirements and translating them into technical solutions
- Implement agreed design on the Java/Javascript, including:
 - End to End Development
 - Deliver your work using best practices
 - Emphasis on testability and maintainability
- Provide support to the test automation team and Provar customers on a day-to-day basis, as and when required
- Work as a team and always help your colleagues deliver their workload
- Become a product expert in Provar
- Learn Salesforce and complete the Salesforce Admin examinations
- Escalate any issues to your line manager promptly

Skills required

You should be friendly and resourceful and have evidence of the following:

Essential:

- Degree educated in a relevant technical discipline
- At least 1 year of experience in Java
- Good programming experience to develop

- applications on any platform
- Strong problem-solving skills, should be able to research and understand undocumented setups and applications
- Willing to work in cross functional skills
- Willing to work effectively in a team environment
- Excellent communications and interpersonal skills
- Proactive thinking with a 'can do' attitude

Preferable:

- Knowledge of CRM solutions, preferably Salesforce.com
- Experience of TDD or BDD development cycle
- Knowledge of Agile Delivery Methodology
- Knowledge of unit, integration and end-to-end system testing and performance tuning of application & documenting the same
- Knowledge of Selenium/ Automation testing
- Knowledge of Web development technologies

What you'll receive

- Competitive salary
- Comprehensive health insurance
- Vibrant culture with regular social activities
- Fun and friendly team

About Provar

Provar is the only code-free, integrated automation testing tool for Salesforce. We deliver the benefits of automation while avoiding the pitfalls of other tools. See our demo videos at vimeo.com/provartesting.

We have offices in Gurgaon (India), London (UK) and Nashville (Tennessee).
