

# Technical Lead (JavaScript)

## Gurgaon, India

We are looking for a Technical Lead to join our product development team in our dynamic Gurgaon office.

Our automated testing tool, **Provar**, specializes in testing Salesforce, the market-leading cloud CRM platform. Our dev team is responsible for developing the tool with efficient code following best practices.

We are looking for a candidate to help fulfill our vision to move the product's UI from Java/SWT to the latest TypeScript/Angular technologies. And then into a Cloud-based service with a NodeJS / AWS Lambda backend.

The candidate must be an innovative thinker who can contribute to the functional design and architecture of the solution as well as having the drive and dedication to take ownership of the existing implementation. The candidate must have strong visual design skills and be able to provide real-world examples which demonstrate these skills.

You'll also gain exposure to a vast number of technologies, including TypeScript, Angular, Chrome Extensions, Salesforce, Google Apps, Domain-Specific Languages, Core Java, REST, SOAP, MQ, JDBC, Javamail, Selenium and many more! You will receive all the training you need on Provar and Salesforce.

## Responsibilities

- Understanding business requirements and translating them into technical solutions
- Create detailed technical design documents
- Document and develop code according to specifications and standards
- Prepare test data and plan and conduct basic unit or module testing
- Provide support for quality assurance testing and defect resolution
- Prepare and package production ready code modules for staging
- Provide technical expertise and support in project design, development, troubleshooting, change and release management.
- Support in the operation of large and complex applications
- Build strong skill sets and add value as a technical expert for various applications.
- Ensure effective implementation of application code and follow best practices to achieve high efficiency and quality
- Implement agreed design on the JavaScript, including:
  - End to End Development
  - Deliver your work using best practices
  - Emphasis on testability and

- maintainability
- Provide support to the test automation team and Provar customers on a day-to-day basis, as and when required
- May be required to be on call to provide support to Test Consultants or Testing community on a need-to basis
- Study upcoming tools and technologies and use them to improve existing solutions and processes.
- Nurture, encourage and lead the team to ensure optimal quality, performance and security parameters and maintain harmony Work as a team and always help your colleagues deliver their workload
- Become a product expert in Provar
- Learn Salesforce and complete the Salesforce Admin examinations
- Escalate any issues to your line manager promptly
- Participate in product team meetings and communicate effectively with peers, architects and across other technology team boundaries, reporting product status as required

## Skills required

You should be friendly and resourceful and have evidence of the following:

### Essential:

- 8+ years strong JavaScript/TypeScript experience in development and implementation of applications using JavaScript/TypeScript, Angular,
- Expert in JavaScript, Angular, Object Oriented Programming concepts.
- Knowledge of TypeScript
- Willing to work in cross functional skills
- Experience of Design Patterns and applying them to solve design problems
- Ability to design based off of business requirements and experience communicating across geographies
- Has worked in small and large teams with Requirements, Design and Development phases and complex implementations
- Willingness and aptitude to learn new skills in a rapidly changing environment
- Excellent communication skills (Oral, written and presentation), organizational and collaboration skills

### Preferable:

- Knowledge of CRM solutions, preferably

- Salesforce.com
- NodeJS
- OAuth2/SAML2
- Knowledge of Grunt or Gulp
- Experience of TDD or BDD development cycle
- Selenium/ Chromedriver
- The candidate must have strong visual design skills and be able to provide real-world examples which demonstrate these skills

## What you'll receive

- Competitive salary
- Comprehensive health insurance
- Vibrant culture with regular social activities
- Fun and friendly team
